

Krok 3: Creative environment - Doctoral studies

Please fill in the information about the doctoral studies.

Doctoral studies:

Provide up to 5 references to doctoral theses defended at your institution in the respective research area, during the period from 1.1.2020 to 31.12.2024. The doctoral theses should document the context, mission, scientific profiling and strategy of your institution in the respective research area (use links to the Central Register of Theses - CRZP).

For applications in the artistic research areas - Performing Arts and Related Art Fields and Visual Arts and Related Art Fields - you may include in this text box a link to a page where you provide a link to the CRZP for each doctoral thesis, but also a link to the documentation of the creative work (within this space you may provide a link to an audio-visual recording or other part of the doctoral thesis that is not included in the document uploaded in the CRZP).

If you are submitting application in a research area in which accreditation for doctoral studies is not granted, you do not provide hyperlinks to defended dissertations. If the applicant does not offer doctoral programmes despite the possibility of accreditation in the relevant research area, the applicant provides a justification in the application.

- ☐ The application is submitted in a research field where accreditation for doctoral studies is not granted.
- ☐ The applying institution does not offer doctoral programs in the given field of the application despite the possibility of accreditation.

Doctoral thesis č. 1

Title: Use of an evidence-based multimodal strategy to eliminate the occurrence of nosocomial infections with PSA etiology at the Trnava University Hospital

Author: Janka Prnová

Supervisor: prof. MUDr. Viera Rusnáková, PhD., MPH

Year: 2020
