### **Projects**

Trnava University project in the context of the National programme of obesity prevention (2008), Analysis of students and employees eating habits

e-Roma Resource was an international project co-financed by the European Union Lifelong Learning Programme. It lasted from January 2014 to December 2015.

SH-CAPAC: The overall aim of the project was to support the EU Member States under particular migratory pressure in their response to health-related challenges. The project was aimed at building capacity in areas of coordination practices, needs assessments, planning actions to strengthen the public health response of local health systems, improving access to health care, and developing health workers' competencies for the delivery of migrant/refugee sensitive health services.
