

Mgr. Zuzana Klocháňová, PhD. – works as Assistant Professor at the Department of Public Health, Faculty of Health Care and Social Work, Trnava University in Trnava from 2017. She specializes in field of epidemiology (epidemiology of communicable and non-communicable diseases, surveillance of infectious diseases, epidemiological studies), in which she developed during her 2-years internship in EPIET (The European Programme for Intervention Epidemiology Training) in 2013 under supervision of professional from ECDC. The internship was based in Polish National Institute of Public Health at the Department of Epidemiology in Warsaw, where Zuzana participated at various projects and outbreak investigations. Besides, she is interested in the field of environmental health, in which she specialized during long term collaboration with the Department of Environmental Health in the Public Health Authority of the Slovak Republic, i.a. during implementation of Health Impact Assessment (HIA) methods in Slovakia. Zuzana also participated at educational activities of HIA in cooperation with WHO Europe, she studied climate change and health issues in the School of Government, Beijing University, in China, and she participated in the project activities at the clinic Mukuru Promotion Centre in Nairobi in Kenya. Zuzana took a part in number of international projects as research project „RAPID - Risk assessment from policy to impact dimension“, „Indoor air quality and health in rural and urban areas in Slovakia and Romania“ by monitoring indoor air quality, „Alzheimer’s disease - Prevalence, access to mental health services, costs and quality of life“ focused on patients with Alzheimer’s disease, or developmental project „Strengthening of continual mother and child care through multilevel educational intervention in South Sudan“. Health of marginalized groups is also a part of Zuzana’s interest. She participates on the EMIS2017 project focused on MSM community with Robert Koch Institute in Berlin. And recently she also drafts a project focused on health of migrants and refugees in cooperation with V4 countries. She presents at international conferences as ESCAIDE or EUPHA.
