

Martina Horváthová, Ph.D., associate professor – current head of the Department of Laboratory methods in Health Care and as a Research Scientist at the Department of Radiation Hygiene at the Faculty of Public Health of the Slovak Medical University. She teaches biophysics, nuclear medicine and protection against ionizing radiation. Her focus is mainly on monitoring the radiation load of the population in medical examinations, quality assurance programs at radiological departments, and evaluating the risk associated with medical exposures. She is a member of the Slovak Health Ministry Commission for quality assurance in radiodiagnosics, radiation oncology and nuclear medicine.

Born: 1974

Ph.D. : 2000

Associate professor /Habilitation/: 2006
